Deadline 11 Sep 2017

**An invoice of \$10, to cover dinner,
will be sent via PayPal.**

AK Steel

Research and Innovation Center

Metallurgists and engineers at AK Steel's Research and Innovation Center provide a wide range of technical services for customers around the world. From microscopic analyses to forming and corrosion simulations, AK Steel has the scientific tools, accreditation and expertise necessary to consistently provide world-class customer service.

In addition to developing new steel products, the company performs advanced tests and analyses on carbon, stainless and electrical steels at its research facility.

On April 7, 2017 AK Steel celebrated the grand opening of its new world-class Research and Innovation Center in Middletown, Ohio. The event marked the formal opening of the new \$36 million, 135,000 square foot facility, built on 16-acres near AK Steel's Middletown Works and its West Chester, Ohio corporate headquarters.

Join us as we tour this new facility and speak with several of the innovators advancing the field of metallurgy.
